A SIMPLE TIRE REPAIR.

Punctures in the well known Morgan & Wright tire are mended about as easily as a man would close a hole in his finger with a bit of court plaster. Inside of the inner tube of the tire lies a long strip of patching rubber, like this:

By injecting M. & W. quick-repair cement through the puncture into this inner tube, and then pressing down on the tire with the thumb, like this.

the repair strip inside is picked up by the cement, thus closing the puncture,

Very simple, but-now every rider should remember these two "buts," or he will fail:

Before injecting cement, pump up the tire. If you don't, the inner tube will be flabby, like this,

and the cement will not get inside of it, where the repair strip lies.

When you have a puncture, get right off. Riding a tire flat, when it has a tack or nail in it, may damage it con-

...\$0 35@\$1 14 In the vast majority of cases, however, the actual result is between 45 and 60 cents per 100 pounds net protection to the trust, and it is impracticable so to combine circumstances as to bring this below 40 cents or above 60 cents for any considerable cent, would average from 67 to 101 per cent, would av

goods that make up the great bulk of As an item of tariff taxation the the importations. The following schedsugar schedule is ideal from the pro- ule, taking the styles that sell, shows tectionist standpoint. Sugar is the one the range proposed: article used by poor and rich to an WHITE LENTILLES ON CARD SOLD TO equal extent, and a tax on which therefore falls most heavily on the poor in proportion to their ability to pay it. No. Lines. Its production and distribution are controlled by a concern which is at once
the greatest of our mean trusts and the
meanest of our great ones.

It is consistent therefore that on this puttons for MANUFACTURING one article there should be levied more one article there should be levied more than one-third of our total tariff taxa-tion, and that our people should be bur-tion. dened by a tax of more than \$90,000,000 that realizes less than \$70,000,000 for the treasury and more than \$20,000,000 for the sugar refining combine, while the same combine is enabled to net because the total sales being limited to an additional \$10,000,000 by the opporthis country would not warrant the tunity given to it to import at present investment of the necessary capital in a duty rates raw sugars from which it plant needed to make the various styles can make refined to be sold by it under wanted. It is evident that the intention the enhanced price assured it by the is to exclude these goods in the interest proposed Aldrich schedule. The net of some higher-cost goods. The pro-"protection" of from 45 to 60 cents per posed duty would be a real hardship and 100 pounds given the trust on its refining process alone should be considered buy "china buttons," as well as on the as sufficient when we remember that manufacturers of cheap shirts, underthe labor cost of this process is slightly wear, etc. less than 61/2 cents per 100 pounds—that Bone Buttons (to sew on)—Present is to say, Senator Aldrich, in behalf of duty, 35 per cent.; McKinley bill, 50 American labor, proposes unduly to tax per cent.; proposed duty, from 106 to wage-carners in order to give the trust 194 per cent. These goods are mostly wage-earners in order to give the trust from five to seven times as much "protection" as it pays for all the labor involved.

Next to the wage-earner the farmer is dear to the protectionist heart, and he is therefore equally favored by the sugar schedule. Of late years throughout the eastern and middle and many of the central states the competition of the far west has driven our farmers from grain raising into fruit culture. This has now so developed that except for exports of canned goods-jams, preserves, etc.-in which we ought to supply the world, the business of fruit raising has, in its turn, become almost profitless. And poverty is now assured to those who are dependent upon fruit culture by the proposed tax of two cents a pound on sugar. This increases by from 50 to 75 per cent, the article which would make up from 40 to 75 per cent, of the total weight of the jams, etc., the export of which might insure

living prices for the surplus fruits, but which is now practically prohibited. And this is "a government of the people, by the people and for the peo-Who are the "people?"

"A License to Steal." That must have been embarrassing information to the United States senate which Statistician Carroll D. Wright furnished that body last week concerning the labor cost of lumber in this country and in Canada. His figures showed that, while the average wages in Canadian sawmills is \$1.41 and \$1.71 per day here, the average labor cost of 1,000 feet of lumber is \$1.28 in Canada and only 94 cents here. The decreased cost of production in this country is attributed to the superior machinery used. Of course, the figures prove the free trade contention that the rate of wages paid does not indicate the cost of production—that low wages are very often more expensive to employers, and vice ersa. But these hard facts furnished by an officer of the government will not dissuade the lumber barons from their purpose to get a tariff on Canadian lumber so that they can the more effectually rob American consumers. Protection-

Single Taxer. Blessed Are the Poor! Representatives of the crockery inerest who have gone to Washington to protest against the new tariff complain that the proposed schedules discriminate against goods used by the poor and in favor of those purchased by the rich. Blessed are the poor, but they need expect little help from a protective
